Full Stack Developer / Front End Developer

HTML | CSS (Tailwind, Bootstrap) | Javascript ,Typescript (ReactJS, NextJS, SvelteKit) | React Native | Node Js | SQL | GIT (github) | Zustand | Redux | ReactQuery | Healthtech Passionate

ABOUT ME

I am a fullstack developer with over 3 years of experience, specializing in creating robust and efficient web and mobile solutions. My expertise spans both frontend and backend, with a particular focus on modern JavaScript technologies.

In frontend development, I excel in TypeScript, React.js, and Next.js, complemented by advanced proficiency in Tailwind CSS for creating responsive and attractive interfaces. My experience with React Native and Expo enables me to develop high-performance mobile applications. On the server side, I am proficient in Node.js and Express.js, allowing me to build scalable and efficient APIs.

My most recent experience as a frontend development lead in a health tech startup has been particularly enriching. There, I have designed and developed complex dashboards for a web portal from scratch, as well as configured the corresponding backend. This project has not only tested my technical skills but has also allowed me to deepen my backend development knowledge, working closely with experts in the field.

My previous training as a dentist, complemented by solid formal education in fullstack development and constant self-directed learning, gives me a unique perspective in the technology sector. My passion for technology and my motivation to always stay at the forefront drive me to continuously learn and improve my skills. This combination of formal and self-taught knowledge allows me to approach projects from multiple angles, especially in the healthcare domain, translating complex needs into effective technological solutions.

I highly value teamwork and effective communication. My experience in the health sector has honed my soft skills, allowing me to collaborate effectively with diverse teams and stakeholders. I am particularly adept at managing expectations and communicating complex technical ideas in an accessible manner.

I stay constantly updated with the latest trends in web and mobile development, driven by my enthusiasm for technological innovation. My goal is to continue growing as a fullstack developer, contributing to challenging

SKILLS

Passionate about technology and building performant user-centered products.
